Supplementary Material

Table S1 - Location of the investigated outcrops in the study area with their main access point, briefly described. Coordinates (WGS84) accuracy is tens of meters.

| Outcrop | Lat. (°N) | Lon. (°E) | Location | Access from |
|-----------|-----------|-----------|--------------|--------------------------------------------------------------------------------------------------------------------|
| Fig. 3a | 46.3963 | 13.4640 | Sella Nevea | Road from Sella Nevea to Piani di Montasio, outcrop of Fig. 3a is visible along a double hairpin turn on the left. |
| Fig. 3b | 46.3968 | 13.4625 | Sella Nevea | Access from left side of outcrop of Fig. 3a, walking off the trail towards West. See Fig. 3c for reference. |
| Fig. 3d | 46.3971 | 13.4616 | Sella Nevea | Same as above, walking off the trail towards West. See Fig. 3c for reference. |
| Fig. 3e | 46.3977 | 13.4607 | Sella Nevea | Same as above, walking off the trail towards West. See Fig. 3c for reference. |
| Fig. 4b-g | 46.3864 | 13.4634 | Sella Nevea | Climbing crag "NUT", along trail CAI 635 |
| Fig. 5c | 46.3928 | 13.4653 | Sella Nevea | SP76 Road, final hairpin turns towards Sella Nevea. Hardly accessible, dangerous slope. |
| Fig. 6a-e | 46.3857 | 13.4739 | Sella Nevea | Along Sella Nevea older ski piste, close to the larger paved parking area Piazzale Slovenia. |
| Fig. 8a | 46.3477 | 13.4168 | Casera Canin | From Malga Coot (Resia Valley), trail CAI 642. |
| Fig. 8b | 46.3477 | 46.3477 | Casera Canin | Same as Fig. 8a. Dangerous access because of slope. |
